

EDUCATION

Princeton University

2023 - May 2027

B.S.E. in Mechanical & Aerospace Engineering; Intended Minors in Statistics & Machine Learning, Robotics

- Relevant coursework: Control Theory, FEA, Numerical Methods, Linear Algebra, Differential Equations, ML, RL, Probability, Fluids

IEEE RAS Multi-Robot Systems Summer School

2026

Participant in 1 week multi-robot systems program for industry + academics hosted at Czech Technical University

PROFESSIONAL EXPERIENCE

IBM, Silicon Valley Lab

2026

AI/ML Engineering Intern

- Data analytics for coding agents
- Mobile app development for coding IDEs

AIntropy

2026

Technical Staff Intern

- Research on multimodal parsing, indexing, retrieval, & infrastructure
- Data curation pipelines for world models

UC Berkeley, Embodied Intelligence & Robotics Center

2025 - Present

Robotics researcher under Dvij Kalaria

- Diffusion-based synthetic data generation for humanoid whole body control, trajectory retargeting + optimization for Unitree G1
- VLA finetuning (GR00T N1.7) for whole body control based in Isaac Sim
- Custom encoder training using frozen SONIC decoders for large scale motion token dataset generation for VLA finetuning

Princeton Robotics, PRPL Lab

2025

Robotics-focused reinforcement learning researcher under Prof. Tom Silver

- Synthetic data generation using particle physics sims for dexterous soft-body manipulation trajectory/action planning via RL (actor-critic)

Princeton Neuroscience Institute

2024 - Present

Reinforcement learning researcher under Prof. Sebastian Seung

- Researched and implemented various RL techniques (Actor-Critic, PPO, imitation learning, deep-Q networks, policy gradient) for computer-using policies
- Integrated DINOv2/DINOv3 vision models for accurate/fine continuous computer control (mouse + keybinds)
- Implemented algorithms for synthetic dataset collection and validation, custom dataset labeling pipelines
- Developed a parallelized pretraining and training algorithm for a multimodal agent that automatically proofreads neuron segmentation in Neuroglancer via Chrome

Volvo Group, Volvo Buses

2025

Mechanical design intern

- Prepared & assessed FEA models for bracket-damper systems for BZRT (electric articulated & biartic models)
- Assisted with production line faults & bus prototype development
- Sheet metal part development, injection-molded plastic part development

La Fondazione Giorgio Cini, ARCHiVe

2024

Machine learning and full-stack desktop app development intern

- Independently developed the frontend and backend for a QT-based desktop app utilizing deep-learning techniques (SegmentAnything), improving workplace efficiency by ~600%
- Investigated and tested deep-learning-based 3D modeling techniques (Gaussian splatting)

AWARDS

Princeton Innovation Forum

2025

Co-founder

- Winner of the 2025 Princeton Innovation Forum for Perimind, a multimodal anesthesia co-pilot trained on perioperative data

EXTRACURRICULARS

NLP, AGI, CV/DL Reading Groups; Princeton AI Alignment; Princeton AI Review

2024 - Present

Study various papers from industry & academia related to natural language processing, alignment, world models/foundation models, computer vision, deep learning

TECHNICAL SKILLS

Skills: Python (Qt, PyTorch), Java, JavaScript, C++, HTML/CSS, Azure, GCP, GCS, Google Product Suite, Excel, Blender, Fusion360, KiCad, Mathematica, Arduino, Figma, Inkscape, Krita, NX, Altium, Creo, Matlab, CATIA v5, Slurm, Azure, IsaacSim, IsaacLab, CI/CD, Wandb
